

## Tribal Tales

We will be learning where the Stone Age period fits in history, how early humans arrived to Britain and how settlements began. We will explore what Stone Age people looked like and how they lived whilst looking at their beliefs and habits.

We will be studying different types of Stone Age tools and then making our own using a variety of materials.

We will also research how Early Man recorded events and stories using cave painting, and having a go at these ourselves.

## Growing Up Skills

### Religious Education

We will be exploring Christianity and Christmas around the world. Does everyone celebrate Christmas? What other winter festivals take place across the world?

### Computing

We will be looking at coding and programming skills to help prepare our children for future professions in technology.

### PSHE

We will continue to follow the SCARF programme. We will also be exploring and taking part in Anti-Bullying week by the NSPCC where the children will develop their understanding further around the concept of bullying and how to look after each other and ourselves.

We shall be writing an information text, preparing a persuasive text, developing, a Stone Age diary, writing a narrative and developing and recording a recount. We will continue to develop our spelling, punctuation and grammar, and getting stuck into our class novel, Stig of the Dump!

## Maths

During this Half Term, we will continue with measuring – capacity and volume, and mass. After that, our focus turns to money, word problems and reasoning, followed by shape and finally time. Plenty to get our teeth into, with lots of real life contexts

On Tuesday afternoons children will have the opportunity to work with specialist staff in PE, and French.

## Special Events

Trip to Creswell Crags.

Trip to L.E.A.D in Nottingham to take part in an enrichment day.

Trip to Sandiacre Library to learn about the service on offer.
